

CORE DRILL

DSS 160 - Stainless-Steel Column for Core Drills

New Column for AK46 Core Drills

For core drilling up to $\varnothing$ 160 mm

AK46 installed on DSS 160 column

New stainless-steel column for AK46

core drilling machines, designed for coring up to 160 mm in diameter. Manufactured with 90% stainless steel and engineered for professional use, the DSS160 is ideal for heavy-duty work and underwater applications, including use in saltwater environments.

Equipped with a central anchor point, four stabilizing feet, and a 360° level, **it can be positioned easily even in the most demanding conditions.**

The column tilts over 45° and features dual positioning for the feed handle, as well as a locking mechanism to prevent accidental movement during tool setup.

TECHNICAL CHARACTERISTICS	DSS 160
Height (mm)	800
Base dimension (mm)	260x200
Slide feet distance (mm)	520
Weigh (kg)	11.5
Max. drilling diameter (mm)	160
Axial inclination	Oltre 45°
Core drill collar (mm)	60 diam. included
