

# WATER PUMPS

## TWP 40

Water pump for testing pressure holding capacity on water networks

Gasoline pump

- *High quality two diaphragm pump and engine speed reductor*
- *Water filter on suction line to prevent stone and particles to enter in pump*
- *High quality water tank with large filler aperture for loading and cleaning*
- *Quick bayonet tank connection for continuous refilling*
- *Can run dry without damage*
- *Stainless steel square tube frame*

**TWP40** is a modern gasoline engine water pump with adjustable pressures up to 40 Bar and flow up to 60 L/min, pump is designed to make test and pressure drop related to time on new water networks. The pump characteristics and its versatility allow to perform the majority of test requested by the European norms. The construction quality, the rational position of components, the practical controls and regulation features makes its operations easy and intuitive to guarantee an use precise and problems free.

| TECHNICAL CHARACTERISTICS | TWP 40                          |
|---------------------------|---------------------------------|
| Weight dry (kg)           | 50                              |
| Dimension (LxH) (cm)      | 70x50x70                        |
| Engine                    | Briggs & Stratton 6 HP Gasoline |
| Starting                  | recoil                          |
| Water flow L/min          | 60 - max adjustable             |
| Water pressure            | 40 Bar - max adjustable         |
| Water tank (l)            | 30                              |
| Water outlet connection   | female swivel 3/8" BSP          |
